

Site\_Specific is a **Not For Profit** association promoting land art in Africa - facilitating, supporting and co-ordinating environmental art creators and patrons. Land Art is particularly suited to merging perceptions regarding culture and nature, thus connecting community and conservation to the benefit of both human inhabitants and the environment.

The **International Land Art Biennale** is our flagship project, but we are also proud to be a partner of the *Eden to Addo Land Art Route*, and we create work in various locations, such as the *Karoo Geoglyph project*, the *Tree of Knowledge of Good and Evil* at the *Woordfees* in Stellenbosch, and the *Ebenezer Land Art Residency* in Plettenberg Bay.
